

MADE IN AMERICA, BY AMERICANS, FOR AMERICANS.
VETERAN OWNED

AACS SERIES 300

- Outside cabin dimensions 100"H X 60"D X 60" W with clear passage measuring 87"X34".
- Switches to a slower operating mode when an ADA badge is presented.
- Connections can be made to the building's fire alarm system, opening both doors immediately to allow evacuation.
- Fire alarm override allows the security officer to close the doors in the event of an attempted security breach. When this is activated the inside door(s) close, the portal scans the interior of the portal to ensure no one is inside, the exterior door(s) close when clear then the portal automatically locks down.
- Smart E-Stop technology forces the person out the same door that was used to enter the portal when the E-Stop is activated.
- Console alerts security of an alarm situation and allows for override of detection systems by an authorized individual.
- Console displays the current status of up to eight portals individually or collectively.
- Logs 16,000 cycles of data for troubleshooting assistance.
- Main Control is internally protected to prevent failures due to overload conditions.
- Voice message is programmable on-site allowing for a custom message to meet the facilities needs.
- Laser-based tailgating system immune to ambient light.
- Laser-based safety sensors immune to ambient light.
- Five-hour battery backup.
- Secure automatic emergency release. Our portals use E-Stop, a secure automatic emergency release, that NEVER gives a clear passage thus keeping the facility secure.
- Powder coated finish available in all RAL listed colors.
- Custom finishes available in stainless steel #4 & non-directional.
- Optional Metal Detection.
- Optional Left Object Detection.
- Glass options include 9/16" safety glass, BR1, BR2, BR2 with film (BR3).
